SKILLS

- Languages: Python, Java, HTML, TypeScript
- Tools: Git, Figma, Squarespace
- Problem solving , teamwork, quick learning
- English: fluency in oral and written language

POSITION OF TRUST

- Secretary, Oulun Tietoteekkarit ry, 2025

PROFILE

As a first-year computer science student, I am eager to learn new things and put what I have learned into practice. I already know the basics, such as Python and version control with Git, and in my spare time I've also explored TypeScript and HTML.
In the future, I hope to work in computer science, especially at the interface of artificial intelligence and wellbeing technologies. I am fascinated by the combination of the two fields and want to be involved in creating solutions that improve people's quality of life through technology.

EXPERIENCE
